)

To: Office of the Secretary
Attn: Assistant Chief, Audio Division
Media Bureau

PETITION FOR RULE MAKING

Clear Channel Broadcasting Licenses, Inc. ("Clear Channel"), licensee of Stations WJCD(FM), Windsor, Virginia, and WKUS(FM), Norfolk, Virginia, by its counsel, hereby submits this Petition for Rule Making, which proposes to (i) delete Channel 299A at Windsor, Virginia and allot Channel 299A to Norfolk, Virginia; and (ii) delete Channel 287B at Norfolk, Virginia and allot Channel 287B to Windsor, Virginia. If this Petition is granted, Clear Channel will file applications for Channel 299A at Norfolk and Channel 287B at Windsor, and construct the facilities as authorized. The following table summarizes the changes requested in this Petition:

City	Channel No.	
	Current	Proposed
Norfolk, Virginia	239B, 254B, 259B, 263B, 275B, 283B, 287B	239B, 254B, 259B, 263B, 275B, 283B, 299A
Windsor, Virginia	299A	287B

014
MB 05-11

I. Station WJCD(FM), Windsor to Norfolk, Virginia

A. Technical Analysis

1. As demonstrated in the Technical Exhibit, Channel 299A can be allotted to Norfolk at coordinates 36-55-26 North Latitude, 76-15-05 West Longitude consistent with Section 73.207 of the Commission's Rules with respect to all existing and proposed domestic allotments and facilities. See Figure 1. A 70 dBu signal can be provided to Norfolk from the proposed reference coordinates. See Figure 8. The relocation of WJCD(FM) from Norfolk to Windsor will result in a predicted net gain in population of 1,061,358 persons within the WJCD(FM) 60 dBu contour. See Figure 2. The entire loss area will continue to receive at least 5 other aural services and will thus remain well served. See Figures 3 and 4.

B. Change in Community of License

2. In *Amendment of the Commission's Rules Regarding Modification of FM and TV Authorizations to Specify a New Community of License* ("Community of License"), 4 FCC Rcd 4870 (1989), *recon. granted in part*, 5 FCC Rcd 7094 (1990), the Commission stated that in order to grant a change in community of license: (1) the proposed use of the channel must be mutually exclusive with its current use; (2) the existing community of license must retain local service; and (3) the proposed arrangement of allotments must be preferred over the existing arrangement under the Commission's allotment priorities. These criteria are met here. First, the proposed allotment of Channel 299A at Norfolk is mutually exclusive with the current allotment of Channel 299A at Windsor. Second, Windsor will not be deprived of its only local service because Station WKUS(FM) is changing its community of license to Windsor. Third, the overall gain in population resulting from this proposal will be 1,023,941 persons, which is preferred under Priority 4. See *Emmetsburg, Iowa, et al.*, 17 FCC Rcd 18308 (2002), *app. for review pending* ("Emmetsburg"); *Greenup, Kentucky and Athens, Ohio*, 6 FCC Rcd 1493 (1991)

(“*Greenup*”); *Revision of FM Assignment Policies and Procedures*, 90 FCC 2d 88 (1982) (“*FM Revision*”).

3. Norfolk is listed in the 2000 U.S. Census with a population of 234,403 persons. Norfolk currently has 14 other stations that are licensed to it. Further, while Norfolk is located in the Virginia Beach, Virginia Urbanized Area a *Tuck* showing is not required because Clear Channel is not proposing a first local service at Norfolk.

II. Station WKUS(FM), Norfolk to Windsor, Virginia

A. Technical Analysis

4. As demonstrated in the Technical Exhibit, Channel 287B can be allotted to Windsor at coordinates 36-48-47 North Latitude, 76-35-57 West Longitude consistent with Section 73.207 of the Commission’s Rules with respect to all existing and proposed domestic allotments and facilities. *See* Figure 1. A 70 dBu signal can be provided to Windsor from the proposed reference coordinates. *See* Figure 9. The relocation of WKUS(FM) from Norfolk to Windsor will result in a predicted net loss in population of 37,417 persons within the WKUS(FM) 60 dBu contour. *See* Figure 5. This population loss is more than overcome by the substantial gains of this proposal as a whole. The entire loss area will continue to receive at least 5 other aural services and will thus remain well served. *See* Figures 6 and 7.

B. Change in Community of License

5. The relocation of WKUS(FM) from Norfolk to Windsor complies with the Commission’s policy in *Community of License, supra*. First, the proposed allotment of Channel 287B at Windsor is mutually exclusive with the current allotment of Channel 287B at Norfolk. Second, Norfolk will not be deprived of its only local service because it will continue to be served by 9 FM stations and 5 AM stations. Third, the overall gain in population resulting from

this proposal will be 1,023,941 persons, which is preferred under Priority 4. *See Emmetsburg, supra; Greenup, Kentucky, supra; FM Revision, supra.*

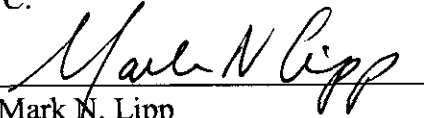

6. Windsor has previously been determined to be qualified as a community by virtue of the allotment of Channel 299A. *See Windsor, Virginia*, 2 FCC Rcd 4229 (1987). Windsor is listed in the 2000 U.S. Census with a population of 933 persons and therefore is presumed to have the status of a community for allotment purposes. *See Arnold and Columbia, California, supra.* Further, Windsor is not located in an Urbanized Area and the proposed contour will not cover over 50% of an Urbanized Area.

III. Conclusion

7. Grant of this Counterproposal is in the public interest because it will provide a net gain in radio service to 1,023,941 people. The communities of Windsor and Norfolk, Virginia will retain local service, and all loss areas will remain well served. Clear Channel reiterates that it will file applications for Channel 299A at Norfolk and Channel 287B at Windsor, and construct the facilities as authorized. Accordingly, the Commission should promptly issue a Notice of Proposed Rule Making.

Respectfully submitted,

CLEAR CHANNEL BROADCASTING
LICENSES, INC.

TECHNICAL EXHIBIT

PETITION FOR RULE MAKING
TO AMEND THE FM TABLE OF ALLOTMENTS

WINDSOR, VIRGINIA
NORFOLK, VIRGINIA

Technical Narrative

This technical narrative and accompanying Figures have been prepared on behalf of stations WJCD(FM), Windsor, Virginia, and WKUS(FM), Norfolk, Virginia, in support of a Petition for Rule Making to amend 47 C.F.R. Section 73.202(b) to reallocate channel 299A at Windsor, Virginia to channel 299A at Norfolk, Virginia; and to reallocate channel 287B at Norfolk, Virginia to Channel 287B at Windsor, Virginia.

As the requested changes are mutually exclusive with the channels' current allotments, Petitioner invokes the provisions of Section 1.420(i).

The following is a summary of the merits of this reallocation proposal:

- The community of Norfolk, Virginia (2000 Census population 234,403 persons) will have local aural service from a number of radio stations¹. The number of stations licensed to serve Norfolk, Virginia will be unchanged by this proposal.
- The community of Windsor, Virginia (2000 Census population 933 persons) will have local aural service from FM station WKUS(FM). The number of stations licensed to serve Windsor will be unchanged by this proposal.

¹ WNVZ(FM), WNOR(FM), WNSB(FM), WTAR(AM), WOWI(FM), WYFI(FM), WVKL(FM), WXMM(FM), WNIS(AM), WJOI(AM), WHRO(FM), WCKO(AM), WCMS(AM) and WHRV(FM) are all licensed to serve Norfolk, Virginia.

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia

- The proposed channel 299A allotment site at Norfolk, Virginia satisfies the Commission's allocations spacing rules.²
- The proposed channel 287B allotment site at Windsor, Virginia satisfies the Commission's allocations spacing rules³.
- The 60 dBu gain area associated with the proposed reallocation of channel 299 will encompass 1,145,579 persons, while the 60 dBu loss area will encompass 84,221 persons, for a net gain of 1,061,358 additional persons served within the WJCD(FM) 60 dBu service contour⁴.
- The channel 299 60 dBu loss area is well served by a number of radio services⁵.
- The 60 dBu gain area associated with the proposed reallocation of channel 287 will encompass 35,588 persons, while the 60 dBu loss area will encompass 73,005 persons, for a net loss of 37,417 persons served within the WKUS(FM) 60 dBu service contour⁶.
- The channel 287 60 dBu loss area is well served by a number of radio services⁷.
- In aggregate, this proposal will bring new service to 1,023,941 persons within the two stations' proposed 60 dBu contours.

² Proposed allotment coordinates for 299A at Norfolk are 36° 55' 26" North, 76° 15' 05" West. See this Exhibit under the heading "Compliance With FCC Rules" for details on allocations considerations with respect to this site. Also see *Figure 1A* accompanying this Exhibit for the channel 299A allocations spacing study.

³ Proposed allotment coordinates for 287B are 36° 48' 47" North, 76° 35' 57" West. See this Exhibit under the heading "Compliance With FCC Rules" for details on allocations considerations with respect to this site. Also see *Figure 1B* accompanying this Exhibit for the channel 287B allocations spacing study.

⁴ See *Figure 2*.

⁵ See *Figures 3 and 4*.

⁶ See *Figure 5*.

⁷ See *Figures 6 and 7*.

Proposed Change in the FM Table of Allotments

Norfolk, Virginia is located in Norfolk City County, Virginia and has a 2000 U.S. Census population of 234,403 persons. Under this proposal, Norfolk will receive local aural radio service from radio stations WNVZ(FM), WNOR(FM), WNSB(FM), WTAR(AM), WOWI(FM), WYFI(FM), WVKL(FM), WXMM(FM), WNIS(AM), WJOI(AM), WHRO(FM), WCKO(AM), WCMS(AM) and WHRV(FM) KBNR(FM), KVNS(AM), KZXX(AM) and KKPS(FM).

Windsor, Virginia is located in Isle of Wight County, Virginia, and has a 2000 U.S. Census population of 933 persons. Under this proposal, Winsdor will receive local aural radio service from FM station WKUS.

Accordingly, Petitioner requests modification of the FM allocation table as follows:

<u>City</u>	<u>Present</u>	<u>Proposed</u>
Windsor, VA	299A	287B
Norfolk, VA	239B, 254B, 259B, 263B, 257B, 283B, 287B	239B, 254B, 259B, 263B, 257B, 283B, 299A

Compliance With FCC Rules

Figure 1A herein is a tabulation of required separations pertinent to use of channel 299A at Norfolk, Virginia. The reference site complies with the Commission's minimum distance separations contained in Section 73.207 of the FCC's rules to all existing, authorized and proposed stations and allotments, except for the existing channel 299A allotment at Windsor, Virginia, for which this proposal is a mutually exclusive substitute.

Operation from the channel 299A reference site will provide the requisite city grade (70 dBu) signal to all of Norfolk.⁸ Figure 8 is a map which was developed using the 2000 U.S. Census Topologically Integrated Geographic Encoding and Referencing (TIGER) Line files which depicts

⁸ SEE Figure 8 herein.

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia

the city grade coverage (70 dBu) contours based on class A facilities (ERP 6 kW/HAAT 100 meters) at the proposed allotment site. As shown, all (100%) of Norfolk is located within the proposed 70 dBu City Grade contour. Norfolk is located 9 kilometers from the proposed WJCD(FM) channel 299A allotment site.

Operation from the channel 287B reference site will provide the requisite city grade (70 dBu) signal to all of Windsor.⁹ Figure 9 is a map which was developed using the 2000 U.S. Census Topologically Integrated Geographic Encoding and Referencing (TIGER) Line files which depicts the city grade coverage (70 dBu) contours based on class B facilities (ERP 50 kW/HAAT 150 meters) at the proposed allotment site. As shown, all (100%) of Windsor is located within the proposed channel 287B 70 dBu City Grade contour. Windsor is located 13 kilometers from the proposed WKUS(FM) channel 287B allotment site.

Urbanized Area Considerations

The WJCD(FM) 299A 70 dBu contour currently encompasses 18% of the Norfolk-Virginia Beach-Newport News Urbanized Area (the "Urbanized Area"). The proposed channel 299A allotment's 70 dBu contour will encompass 24% of the Urbanized Area¹⁰.

The WKUS(FM) 287B 70 dBu contour currently encompasses 64% of the Urbanized Area. The proposed channel 287B allotment's 70 dBu contour will encompass 42% of the Urbanized Area¹¹.

60 dBu Gain and Loss Areas

There are currently 138,031 persons residing within the WJCD(FM) channel 299A 60 dBu contour. There will be 1,199,389 persons residing within the proposed WJCD(FM) 299A 60 dBu contour. 53,810 persons currently residing within the WJCD(FM) 60 dBu contour will continue to receive service from WJCD(FM) under this proposal. 84,221 persons

⁹ SEE Figure 9.

¹⁰ SEE Figure 8.

¹¹ SEE Figure 9.

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia

will lose service. 1,145,579 persons will gain new service within the proposed WJCD(FM) 60 dBu contour as a result of the proposed 299A operation at Norfolk, VA, for a net aggregate gain of 1,061,358 persons. See *Figure 2*.

The 60 dBu loss area related to the reallocation of channel 299A to channel 299A is well served by many aural services. See *Figures 3 and 4*.

There are currently 1,495,751 persons residing within the WKUS(FM) channel 287B 60 dBu contour. There will be 1,458,334 persons residing within the proposed WKUS(FM) 287B 60 dBu contour. 1,422,746 persons currently residing within the WKUS(FM) 60 dBu contour will continue to receive service from WKUS(FM) under this proposal. 73,005 persons will lose service. 35,588 persons will gain new service within the proposed WKUS(FM) 60 dBu contour as a result of the proposed 287B operation at Windsor, Virginia, for a net loss of 37,417 persons. See *Figure 5*.

The 60 dBu loss area related to the reallocation of channel 287B at Norfolk to channel 287B at Windsor is well served by many aural services. See *Figures 6 and 6*.

In aggregate, the two reallocations detailed in this proposal will bring new protected contour service to 1,023,941 persons.

Coverage Contours

The FM predicted coverage contours were calculated in accordance with the provisions of 47 C.F.R. Section 73.313, except that, in accordance with current FCC practice, uniform terrain was assumed in all directions.

Population and Area

The population within the FM primary service contour (1 mV/m) was calculated using a computer program that utilizes the 2000 U.S. Census database of "population centroids". The program adds the populations of those U.S. Census designated areas whose centroid lies within each service area.

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia

Conclusion

Channel 299A can be reallocated from Windsor, Virginia to channel 299A at Norfolk, Virginia, in compliance with all applicable Commission rules. Channel 287B can likewise be reallocated from Norfolk, Virginia to channel 287B at Windsor, Virginia in compliance with all applicable Commission rules. No service will be lost in any underserved area¹² and no new underserved areas will be created as a result of this proposal. The proposal will bring additional protected contour service to 1,023,941 persons. Therefore, Petitioner requests the reallocation of channel 299A from Windsor, Virginia to 299A at Norfolk, Virginia; and the reallocation of channel 287B at Norfolk, Virginia to 287B at Windsor, Virginia be granted.

Respectfully submitted,

Stephen G. Davis
Senior Vice President
Clear Channel Broadcasting Licenses, Inc.
Capstar TX Limited Partnership

February 11, 2005

¹² Defined as an area receiving service from less than five aural broadcast services. In the case of this proposal, the protected contour (60 dBu for class A stations, 60 dBu for class B stations) loss areas will continue to receive protected contour service from multiple sources, local and distant. SEE Figures 3, 4, 6 and 7.

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia

Figure 5 -- WKUS(FM) Channel 287 60 dBu Gain and Loss Areas

The map displays the North Atlantic Ocean region, bounded by 120°W to 75°W longitude and 120°N to 36°N latitude. The coastline of North America is shown on the left, and the coastline of Europe and Africa are on the right. A grid of latitude and longitude lines is overlaid. A large, irregularly shaped area is outlined, representing the 60 dBu Loss Area. A callout box points to this area, stating: "60 dBu Loss Area", "73,005 Persons", and "1,250 sq. km.". The map also shows several smaller, irregularly shaped areas, possibly representing other loss areas or specific regions of interest.

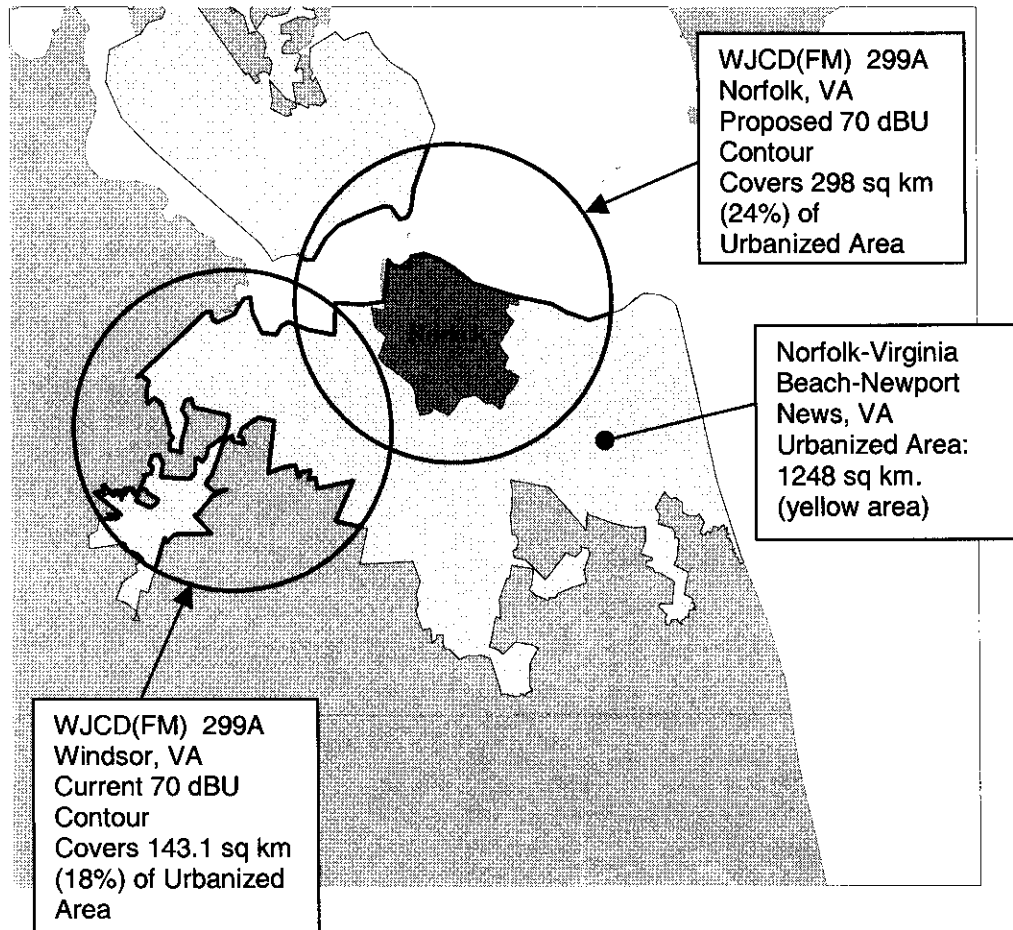

Channel 299 and channel 287, Windsor, Virginia and Norfolk, Virginia
